I am a 6th semester student of Bachelor of Informatics Engineering, Surabaya State University. I am a person who easily learns new things, communicates effectively, solves problems well, and works collaboratively in a team. I possess expertise in HTML, JavaScript, CSS, UI/UX, Python, and Laravel for web development, along with skills in public speaking, leadership, project management, and data analysis. According to my educational background, I am interested in the fields of Web Development, UI/UX Design, Front-End Development, Backend Development, Business Development, Systems, and Data Analysis.

PROJECTS EXPERIENCE

SAVIOR

Bandung, Indonesia

Front-End Web Developer, Back-End Developer, and Project Manager

November - December 2024

- Selected as the best capstone project on Dicoding Indonesia's program for developing "SAVIOR," a Surabaya Smart City platform aimed at reporting urban issues and promoting digital waste management.

- Built a web-based reporting system enabling users to report incidents such as pollution, infrastructure damage, traffic congestion, and accidents directly to relevant authorities.
- Integrated a waste-to-digital currency feature, allowing citizens to exchange waste for digital currency redeemable for essential goods.

MUZZER

Surabaya, Indonesia

Front-End Web Developer

Desember 2024

- Developed the platform's front-end using HTML, CSS, and JavaScript, implementing an interactive and user-friendly design for optimal user experience.
- Collaborated with a small team to ensure the seamless integration of restaurant data, focusing on design consistency and responsive web elements.

KENAYASITE

Surabaya, Indonesia

Front-End Web Developer and Project Manager

November 2024

- Led the development of KENAYASITE, a business platform offering website creation, design, and task services, serving as both Front-End Web Developer and Project Manager.
- Managed and coordinated a team of 2 members to ensure smooth project execution, task delegation, and on-time delivery.
- Developed the platform's front-end using HTML, CSS, JavaScript, and integrated modern design principles for enhanced user experience.

SONGGORITI.EP

Surabaya, Indonesia

Front-End Web Developer

May 2024

- Developed SONGGORITI.EP, a Smart Village website designed to promote tourism and boost the local economy of Songgoriti through digital presence.
- Designed and implemented the front-end using HTML, CSS, and JavaScript, focusing on visual appeal and user-friendly navigation.

Remaking Website BEM UNESA for Education on Human-Computer Interaction

Surabaya, Indonesia

Front-End Web Developer

November – Desember 2023

- Redesigned the BEM UNESA website as part of a Human-Computer Interaction (HCI) course project, focusing on improved usability and modern visual design.
- Developed the front-end using HTML, CSS, and JavaScript, ensuring a responsive, user-friendly, and accessible interface across all devices.
- Delivered a functional and visually appealing website that aligns with the organization's identity, improving clarity in information delivery for students and stakeholders.

BLITZZ

Surabaya, Indonesia

Front-End Web and Back-End Developer

May 2023

- Developed BLITZZ, an educational website offering comprehensive courses on software and hardware for university students, designed with structured modules, quizzes, and progress tracking features.
- Enhanced user engagement by implementing an interactive interface using HTML, CSS, and JavaScript, ensuring a seamless learning experience across devices.
